Subject: glyphosate

Hi Dan,

To follow up on our conversation just now, here is the link to the public glyphosate web page, perhaps RD wants to post notice somewhere online as well for the proposition 65 notice that you are working on: <https://www.epa.gov/ingredients-used-pesticide-products/glyphosate>

I'm also attaching the glyphosate list of contacts that I've kept over the years (attached)—there are some contacts for the main data doers--syngenta, monsanto, cheminova, helm, basf, etc in there. PRD's main point of contact for glyphosate is Katie Miller, coordinator of the Joint Glyphosate Task Force: katie@dgminc.net. I think it would be alright to contact her and ask her to distribute the news to the members of the task force.

Dana, Ricardo, and Meg—to pull you into the loop, Dan's group is working on sending a mass mailer to all glyphosate registrants notifying them that EPA will not stamp any label that indicates that glyphosate is carcinogenic, and any labels that currently indicate that glyphosate is carcinogenic must be amended to remove that language. Some registrants have requested to put that change on a few of the labels due to California's prop 65 rule, but EPA will not allow language on labels that is misleading and contrary to our risk conclusions. RD is looking for a master list of the contacts of all glyphosate registrants (including end-use registrants). I have not attempted to pull together such a list over the years because it would be a very long one, and we did not have occasion to communicate with all registrants at once. But I'm thinking for the ID and for labeling implementation, we might need that list.

Dan—Meg is now the glyphosate CRM, she can help assist RD if there is anything more you might need.

Thanks,

Khue Nguyen
